Usage dos

The landscape logo should be the first choice of main usage. Portrait logo is only to be used if space is limited.

Do use the light logo on a brand grey background.

The logo icon on its own may be used as an accent item as a 10% tint.

The tinted icon may be used as an off page element ideally in the bottom areas so the yellow top may show.

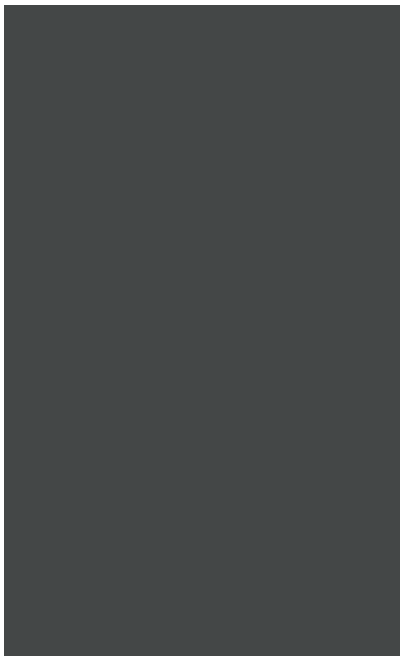

The logo may be placed in a white box with rounded corners and placed top left with the box off the page.

IF the design warrants it, an 80% black blend set to multiply is allowed on top of the image background to help logo stand out.
